Redefining the way **you access WEB3**

@KisekiWallet

Kiseki PitchDeck

Introduction

- Kiseki Wallet is a revolutionary all-in-one DeFi tool that is designed to elevate your Web3 experience.
- Our goal is to bring speed, functionality, and seamless integration to the rapidly growing DeFi industry.
- With a focus on user-centric design and cutting-edge technology, Kiseki is built to meet the needs of DeFi users everywhere.

The sole mission of Kiseki is to make DeFi safe and more accessible to thousands of users everyday, regardless of their level of technical expertise or familiarity with blockchain technology.

Behind the Name

- In mythology, the name "Kiseki" is often associated with the concept of light and enlightenment.
- In this context, the Kiseki DeFi wallet can be seen as a beacon of light in the world of decentralized finance, guiding users through the often complex and confusing world of crypto and DeFi.
- Like the mythical figure of Kiseki, the DeFi wallet shines a light on the path to financial freedom, offering users a secure and convenient way to manage their digital assets.

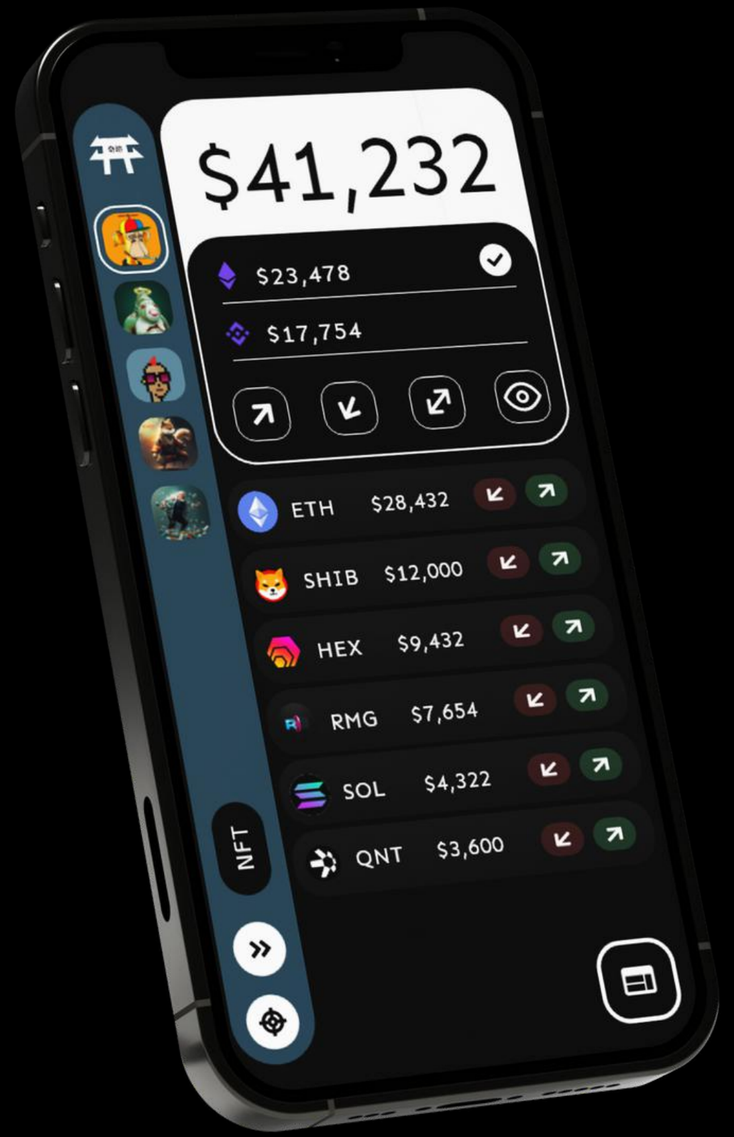
The Problem Today

- The most common issues that users may encounter when using DeFi wallets, such as difficulty navigating the interface, difficulty understanding how to perform certain functions, and problems with transaction execution.

- It's important to note that DeFi technology is still relatively new and can be complex, hence it's quite common for users to experience some difficulties when using it which discourages a lot of users when they begin with DeFi.

- As the Defi ecosystem continues to grow and evolve, we believe that the Kiseki wallet will play a vital role in making decentralized finance accessible and easy to use for all.

- We are excited to bring the Kiseki wallet to users and look forward to seeing it make a positive impact in the Defi.

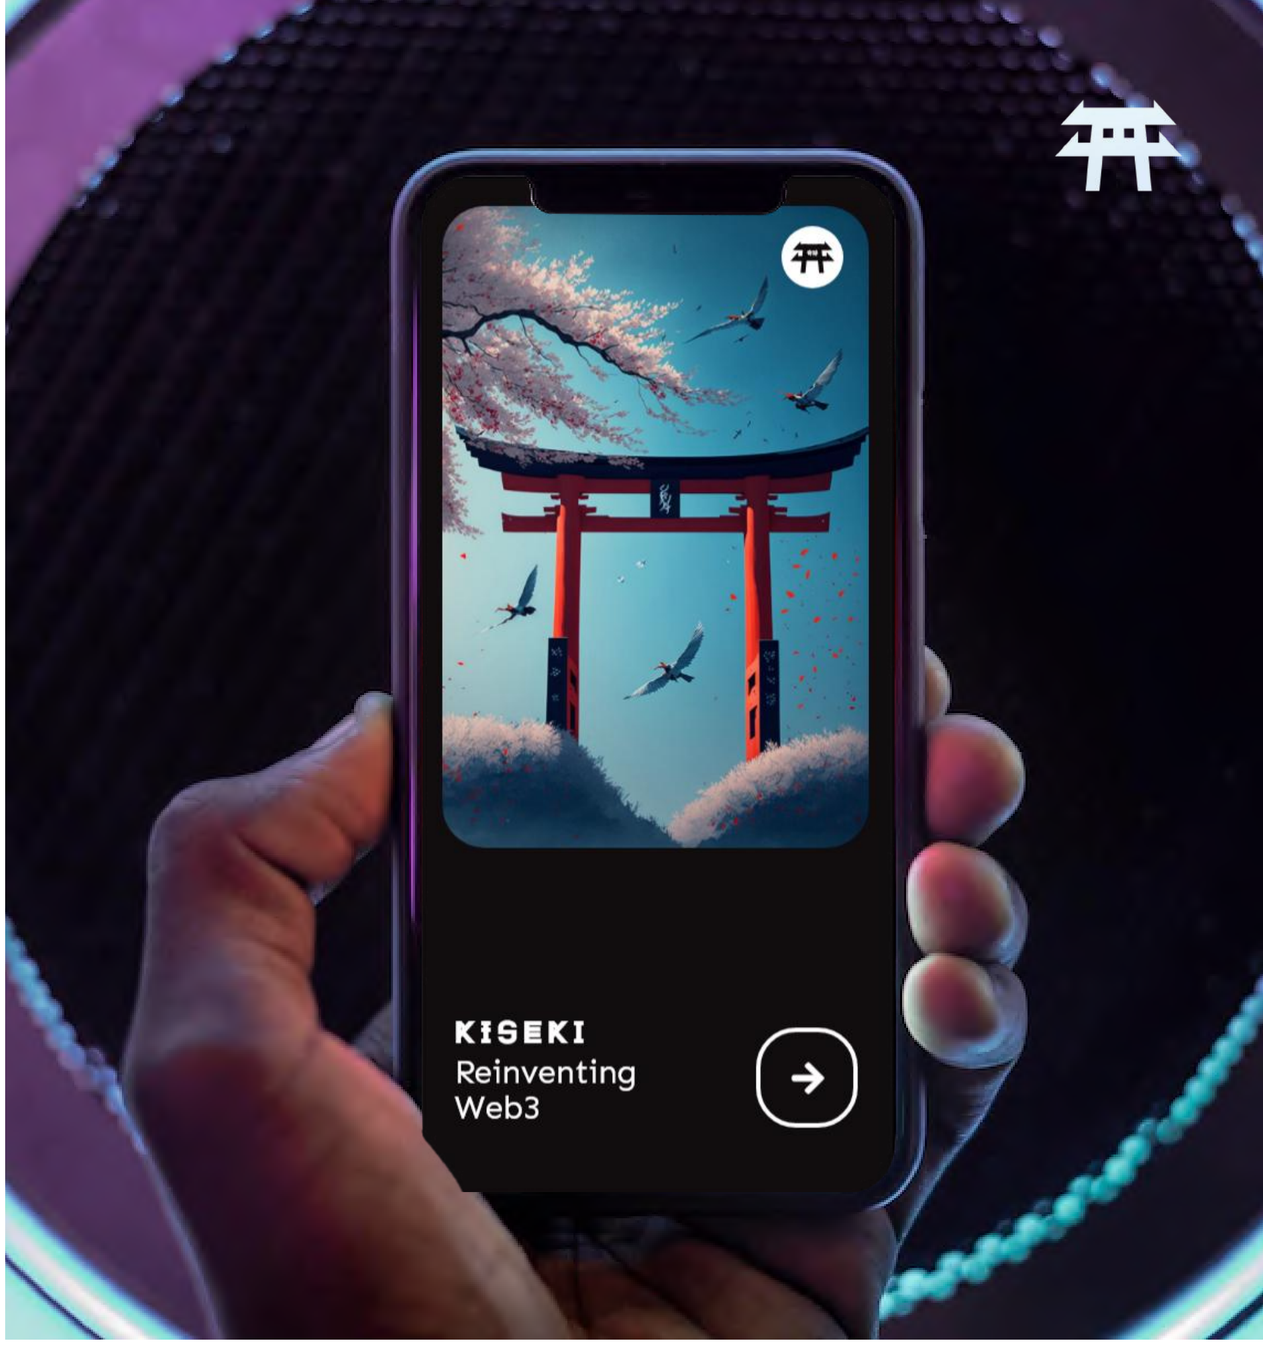


Features:

Kiseki will offer a wide range of features to meet the needs of Defi users. These features include:

- Support for multiple blockchain protocols
- Intuitive user interface
- Secure storage
- Low fees
- Support for decentralized applications (DApps)
- Snipe tokens
- Fake URL detector
- Unique NFT airdrop: Exclusive for Pinksale Fairlaunch buyers who invest 1 BNB and above.
- In-wallet DApp explorer

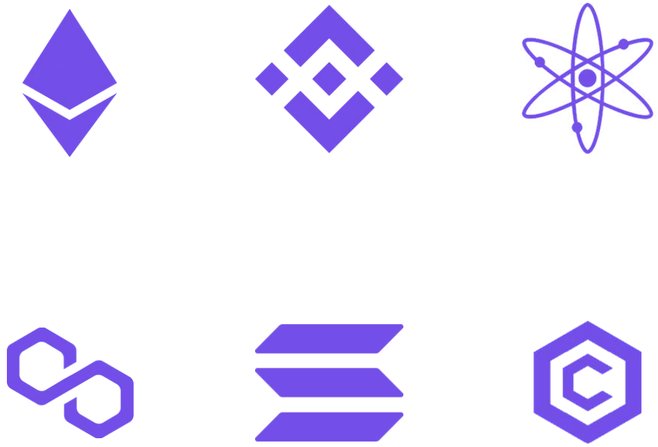
and much more!



FEATURES

Support for multiple blockchain protocols:

- Kiseki Wallet supports multiple blockchain protocols, giving users the flexibility to access and manage their assets on various platforms.
- Our user-friendly interface allows for easy switching between different blockchain protocols and profiles, making it seamless to manage multiple accounts.
- With Kiseki Wallet, users have the ability to customize and personalize their experience, tailoring it to their individual needs and preferences.
- Our in-wallet DApp explorer also allows for easy discovery and interaction with decentralized applications on different blockchain protocols.
- Kiseki Wallet's intuitive design and multi-protocol support makes it the go-to choice for managing multiple crypto accounts.



Plus More

FEATURES

Intuitive user interface

- The UI of the Kiseki wallet has been designed with aesthetics and usability in mind. It features a clean and modern design that is easy on the eyes and intuitive to navigate.
- The wallet has a responsive layout that adapts to different screen sizes and devices, making it easy to use on a wide range of devices.
- To make it easy for users to manage their digital assets, the wallet includes a range of helpful features and tools, such as "Quick swap mode" for easily/faster swapping in tokens and "snipe mode" for sniping early token launches.
- The wallet also includes a range of customization options, such as the ability to choose from different color schemes and themes.

FEATURES

Secure storage:

Kiseki will use advanced security measures to ensure that users' digital assets are safe and secure. This will include support for hardware wallets and other security measures.

Low fees

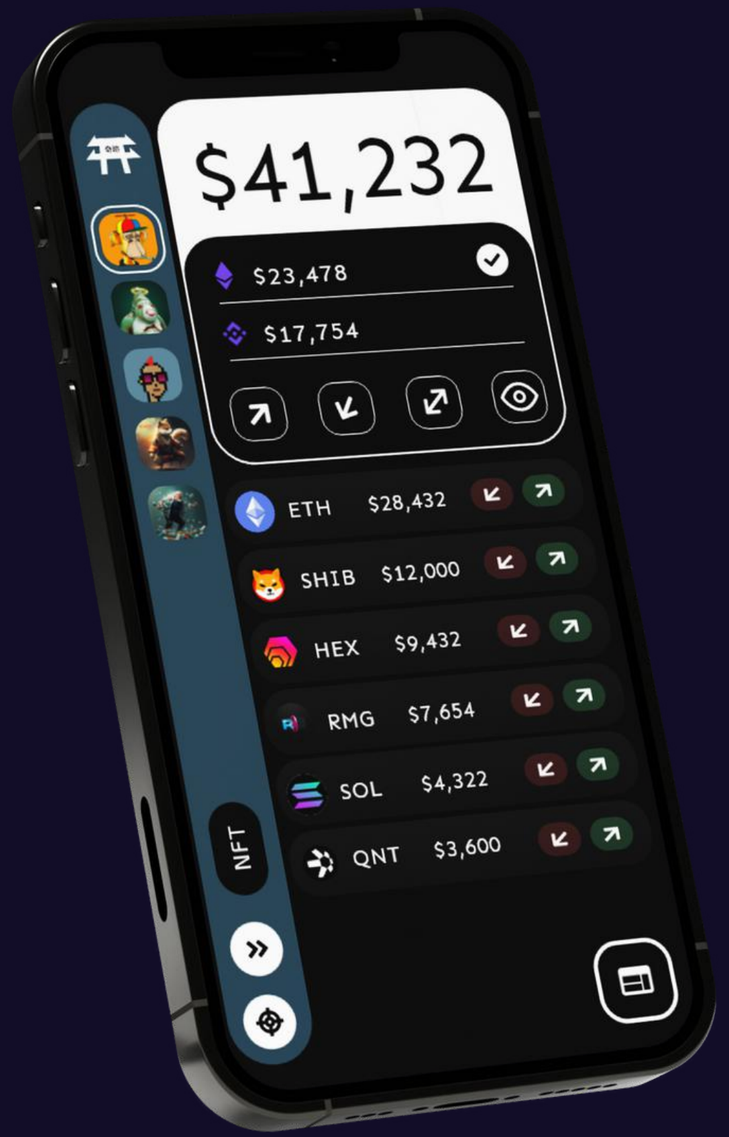
Kiseki will aim to keep fees as low as possible, making it an affordable option for Defi users.

Support for decentralized applications (DApps):

Kiseki will offer support for a wide range of Defi applications, allowing users to easily interact with these applications and take advantage of their features.

We're building a wallet that focused on speed, functionality, seamless integration and is designed for the a rapidly growing industry.

Kiseki wallet has been carefully designed to provide users with a pleasant and seamless experience. It has been tested extensively to ensure that it is reliable, easy to use, and free of bugs and other issues.

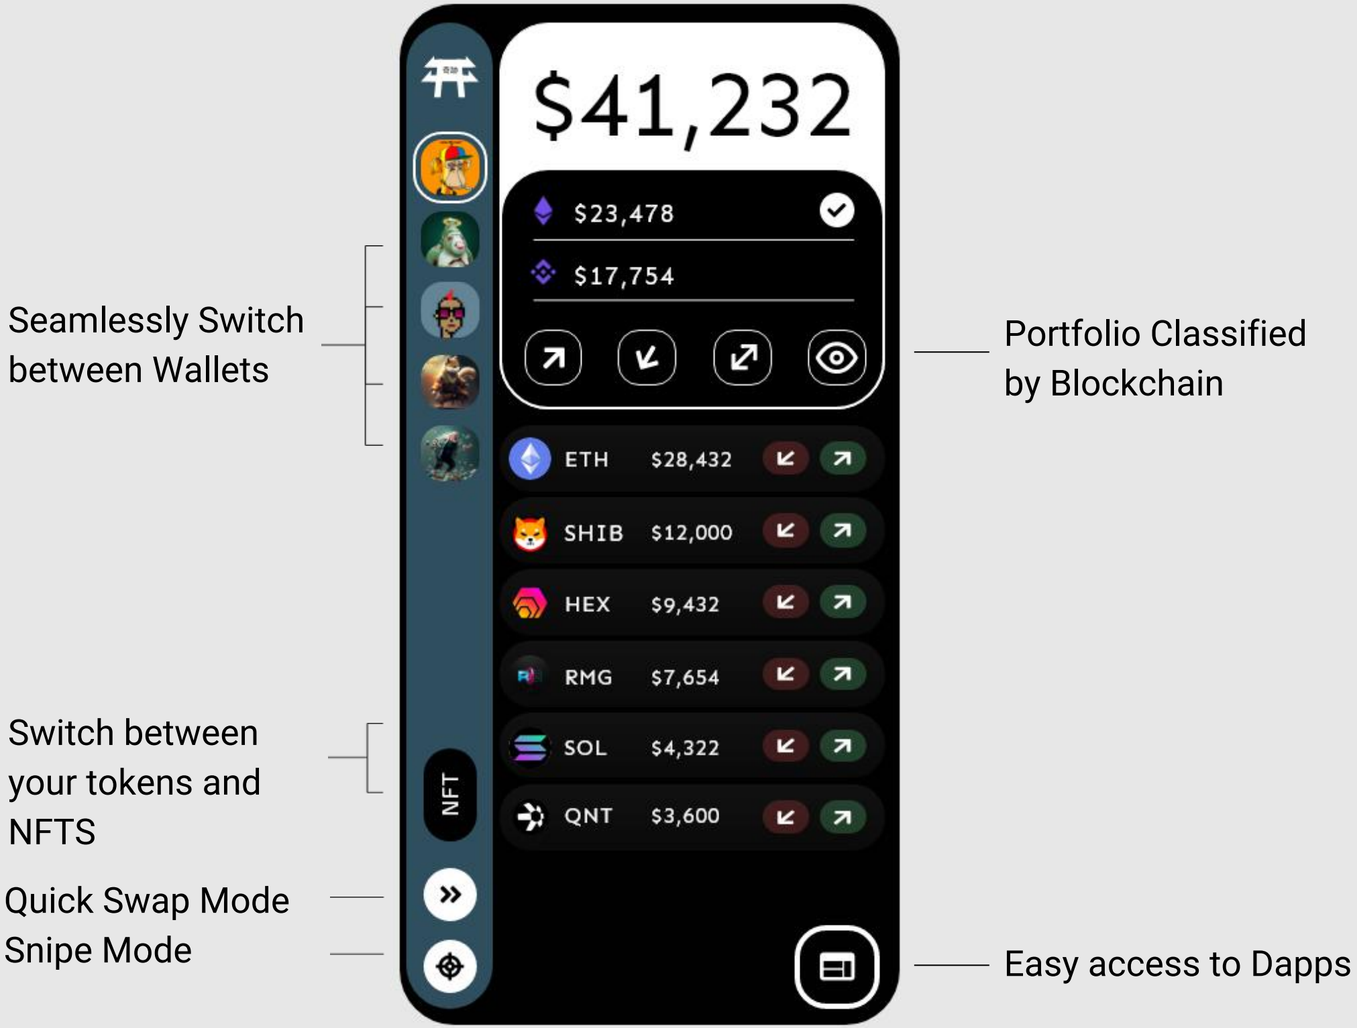


Our Solution

A truly revolutionary design

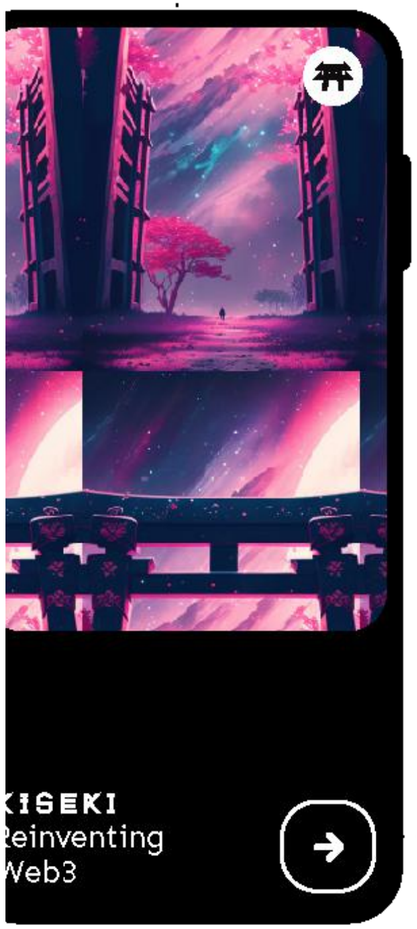
Everything you need is just a click away!

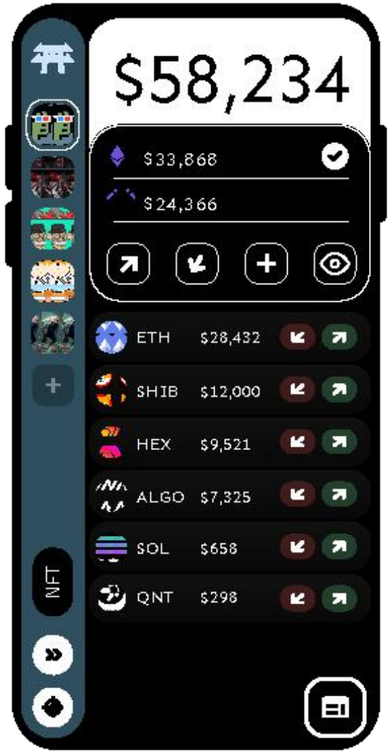
The next time you want to ape an 100x gem or switch between wallets immediately, it's a matter of seconds!



The Design System

Dynamic Splash Screen to showcase relevant untracked news





Instantly Switch b/w 6 wallets

w1 w2 w3 w4 w5 w6

Multichain - Portfolio Tracker

Send | Receive | Custom Tokens | Portfolio Privacy

NFT Viewer → List / Grid → Classified Bloackch

Quick Swap Mode — wQ — transfer — w0

Wallet not connected to main for security reasons

Sniper Mode — wS — transfer — w0

Wallet not connected to main for security reasons

Browser

Native Dapps

Whitelisted Dapps

Browser → Select Blockchain → Token Checker

Features:

Quick-Swap Mode

Buying a token instantly has never been so easier before! With our built-in Quick Swap you don't have to panic when there's a dip and hit multiple buttons to execute a task!

Built-in Sniper

The wallet will feature a simple-to-use Sniper built inside. The sniper will use a different wallet from that of the main wallet to enhance security.

Future Developments:

In-wallet governance:

Kiseki Wallet will enable users to participate in on-chain governance directly from the wallet, allowing them to vote on protocol upgrades and other community decisions.

Built-in Launchpad

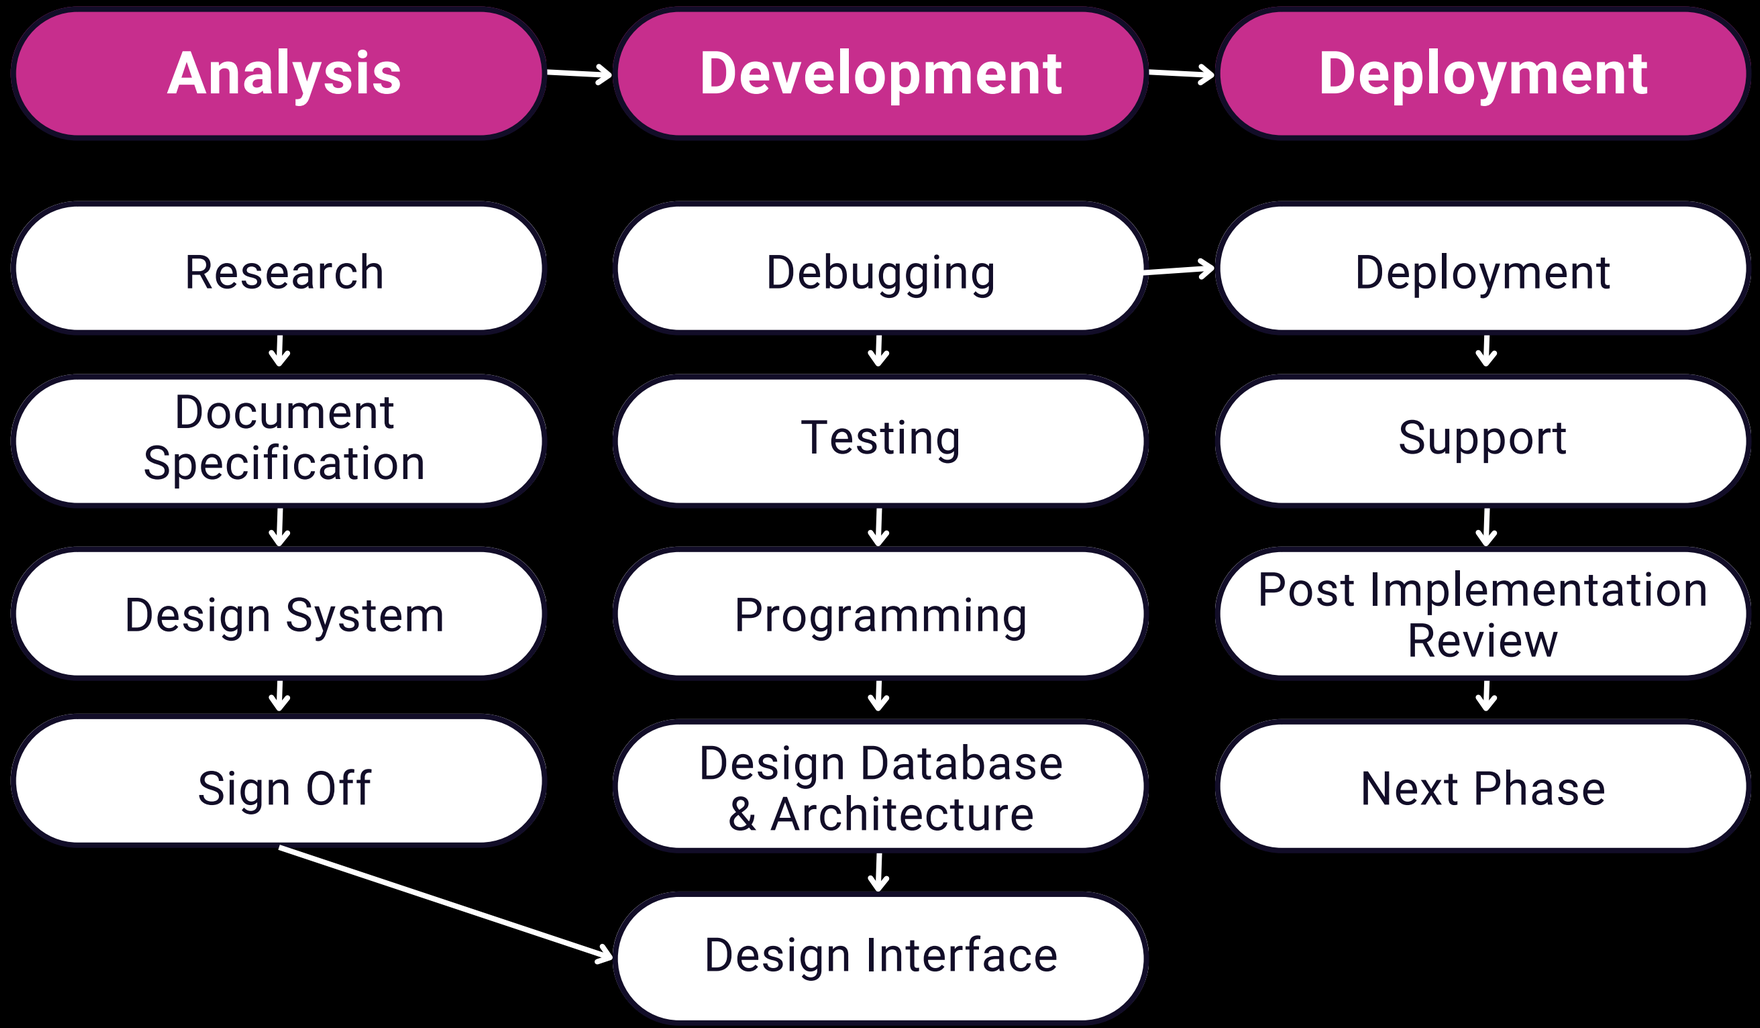
Kiseki Wallet will have a built-in launchpad feature that will allow users to easily participate in initial coin offerings (ICOs) and other token launches directly from the wallet. There will be a unique feature where users will be able to schedule in future presales

Automatic Token Update

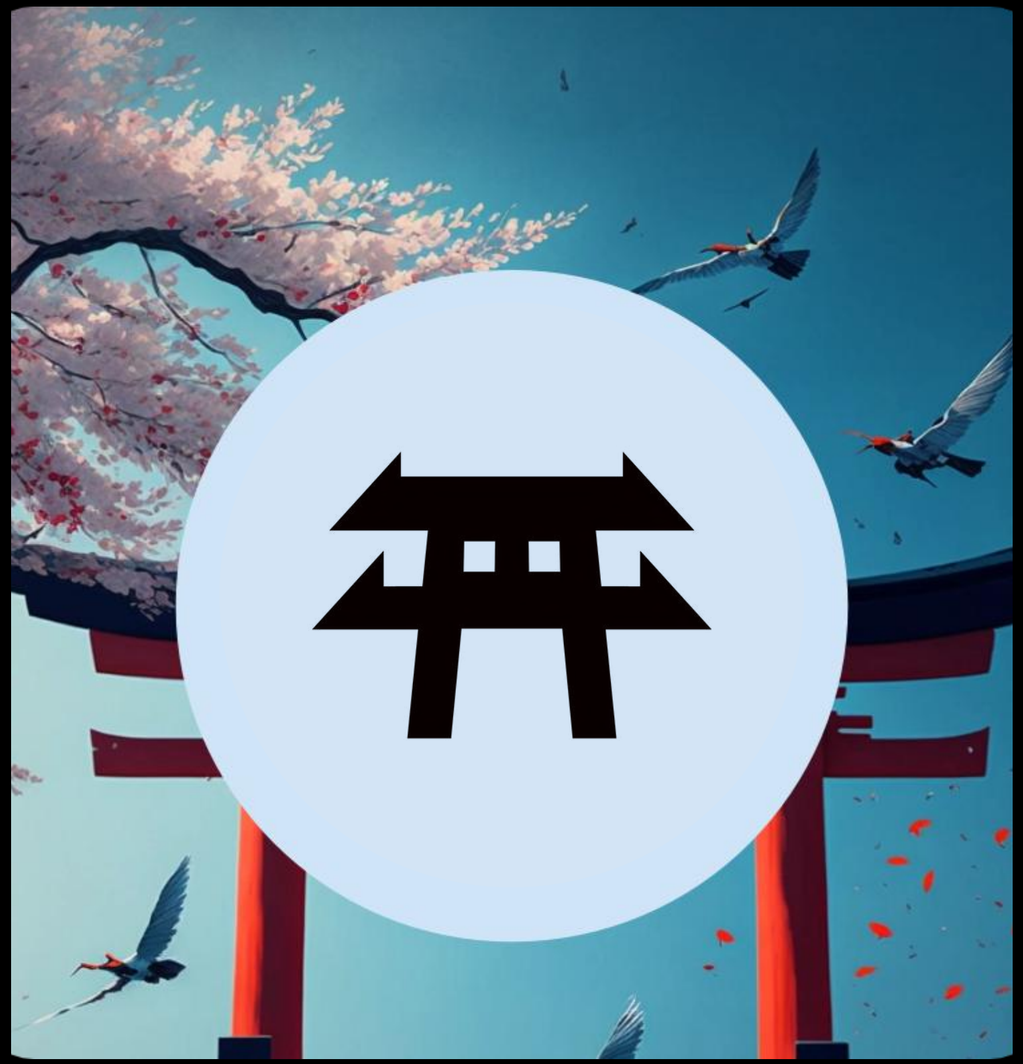
Kiseki Wallet will have an automatic token update feature that will automatically detect and add new tokens to the wallet, keeping the user's portfolio up-to-date.

Development Roadmap

Development Roadmap



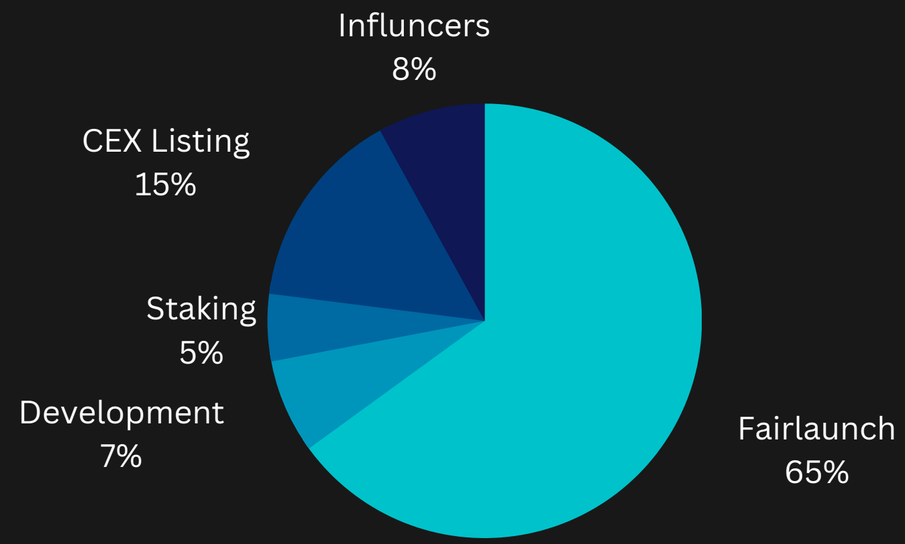
The development of the Kiseki wallet has been carefully planned and will be carried out in four stages: research and development, prototyping and testing, beta testing, and launch. Each of these stages is designed to ensure that the final product is reliable, user-friendly, and free of bugs and other issues. We believe that this attention to detail, combined with the wallet's innovative features and focus on usability, make it a standout platform in the DeFi community.



Total Supply: 100 Million

Taxes: 0% Buy/Sell. Will be Changed.

- **Fairlaunch :** 65,000,000 Tokens
- **Development**: 7,000,000 Tokens
- **Staking** : 5,000,000 (Locked)
- **CEX Listings**: 15,000,000 (Locked)
- **Influencers | Partners:** 8,000,000 Tokens



Project Roadmap*

The roadmap is updated accordingly with the progress.

PHASE **01**

Summary

- In conclusion, the Kiseki DeFi wallet is a promising solution for those looking to easily and securely manage their digital assets in the decentralized finance ecosystem.

- With support for multiple blockchain protocols, a user-friendly interface, and low fees, the Kiseki wallet offers a convenient and cost-effective way to participate in DeFi.

- Additionally, the support for a wide range of DApps means that users can easily interact with and take advantage of the various Defi applications available.
